ref: <http://www.jeffreyaugustine.com/default.htm>

My name is Jeffrey Augustine. Some of my readers will know me from my work as **J. Swift** here at the famous

xenu.net.

***The Origin of the Universe and the Masonic Pyramid: The Queen of Heaven*** presents my cosmological alternative to Divine Creation and the Big Bang.

While I am a Master Mason and a Knight Templar, my work offers secrets that these societies do not possess. Yet, had I not worked and traveled in Masonic lands, I would not have seen the larger patterns and secrets unfold. After working in Masonry and in my own work -- which spans a range from rockets to mysticism to lasers -- I was able to morph the mysterious symbol of the Masonic Pyramid into the **Day Dream Pyramid** shown on the cover of the book.

This pyramid is the Pandora's Box I open.

From out of this box flies secrets about the origins of the Universe, the Divinities, and why religions contain only fragmentary information about Infinity.

***The Queen of Heaven*** is written in the literary style of a mystical treatise. I use storytelling, very potent symbology, and Zen in order to create a stunning experience for my reader. I want this book to be like a big big box of fireworks going off in your head. Once you understand the logic of my argument, you may be extremely surprised at how easy it is to reconceptualize Divine Creation and the Big Bang. Paradoxically, you will see why Divine Creation and the Big Bang are correct as points of view. If you were in this Universe when the event I describe happened, you might see it as either Divine Creation or the Big Bang. Science can measure the Cosmic Microwave Background (CMB) energy remnant from what it calls the Big Bang. The five billion religious people on Earth feel the energies of the various Divinities. What we can be sure of this: Something happened. This book traces it back to Infinity.

What I show you is the primal event from both sides, from Infinity and from our Universe. How can I possibly do such a thing you may ask? Well, you will have to read the book to find out!

\*\*\*\*\*

I am self-publishing at lulu.com while I am shopping the book. I have two more books lined up behind this one. The three books will form a trilogy.

Lulu is a great way for anyone to self-publish at no cost. Anyone who wants to write a book on their life in Scientology, or any other topic, does not have to wait to find a publisher. They can self-publish and then look for an agent and a publisher as they build an audience online. I am always glad to help aspiring authors: [scienowriter@gmail.com](mailto:scienowriter@gmail.com)

\*\*\*\*\*

I recommend purchasing the PDF download in order to see the book in full color. As with my work here at OCMB, I lavishly illustrated my book. I created about fifty unique symbols and drawings for my book. I further added many color photos of beautiful places such as the Paris Opera House and Machu Picchu. The book is 329 pages and about 125,000 words.

[Preview Chapter One](#)

**The book can be purchased at the links below:**

**Q: Is your book about the Church of Scientology?**

**A: No.** My book is a cosmology. It is not about Scientology or my work as a Scientology critic. CoS and other cults will be covered in my next book. Entitled, ***Psychic Architecture***, my next book will cover, among other topics, the subject of coercive psycho-mechanics as used in CoS and other cults. In order to talk about CoS and Consciousness in general, however, I had to write this first book in order to establish my Cosmology and model of Consciousness.

The Liberation of Human Consciousness is a central theme in my work. I mention CoS in chapter five of my new book. Entitled, ***Unaccountable Phenomena***, the chapter discusses the hyper-expansion of Human Consciousness. In this section, the Church of Scientology receives only a scant mention. I favorably mention Marty's blog along with WWP and xenu.net in this section of my book. Here is an excerpt to show the context in which these mentions occur:

**"The skilled, artful emergence of new Mysticism and Myth is always happening and is always expanding Human Consciousness while eroding the Old Religions. The internet is illustrative of New Technology opening the doors for new forms of Mysticism and Myth to emerge. The search engine Google is one of the major Flood Gates through which a massive volume and diversity of information on everything can flow. One can Google anything and get search results. Google is tremendously successful because it provides links to oceans of information and places no moral judgments upon what a person is looking for...**

**"The New Reality for the New World is Unlimited Information and all of the Implications that go with Unlimited Information. The implications of Unlimited Information for SpiritMatter Religion are staggering...**

**"At present, these Spiritual-Mystical events are accelerating in the World as a function of Unlimited Information and the stresses of financial collapse. The internet has opened the Flood Gates to websites that discuss conspiracy theories, extraterrestrials, weather wars, and of course one of my favorites [Coast to Coast AM](#) with George Noory. There has been an Onslaught of Unaccountable Phenomena going on in the World since the end of WWII. The internet has accelerated the Onslaught. [Wikileaks](#) has powered in with incredible leaks from sources inside of governments and corporations. This is the internet unweaving and exposing fraud at all levels. Scientology has felt the whip of the internet at sites such as [xenu.net](#), Anonymous' website [whyweprotest.org](#), and the blog [Moving On Up a Little Higher](#). Scientology may well become the first religion to be destroyed by the internet. More people than ever before are walking away from Scientology as a result of the internet.**

I obviously could not mention all of the websites and the blogs in one paragraph. I am working on a blog for my new book where I will link ESMB, ARS, Lermanet.com, gerryarmstrong.org and the other key websites and blogs.

**Q: Does your book discuss the Mayan Prophecy concerning 2012?**

**A: No.**

**Q: Are you sure you only mention CoS only once in your book?**

**A: Come to think of it, I mention Scientology one other time in passing.**

Clearly this is the work of the worst sort of espee, a complete and total psych case squirrel. Reading this book is likely to derail you from your progress up the bridge to total freedom. At best, it is likely to cost you, AFTER a lengthy detour thru Ethics, a few dozen expensive's worth of repair auditing. Anyone who would like to avoid spending their next hundred thousand years or so picking up the bodies of slugs and earthworms would be well advised to steer clear of it alltogether. Furthermore, you are required to write a KR on anyone you know who DOES read this entheta work.

Instead of spending money on this book, do the right thing ... tack three zero's onto the price of the book and donate that amount to your local ideal org. That is how we fight entheta and move towards a cleared planet. This is our one shot to get out of the trap, your next countless eons depend upon what you do today here in Scientology. It is that important.

Pete

Kudos to you for releasing your work, J. Swift!

Indeed closer to the first order than the last -

Order Number: 4342123

Order Date: 2010-06-27 18:55:00

Order Status: PAID

**Joseph Cardinal Bernardin wrote:**One of the hallmarks of our democratic system of government and our social environment here in the United States is the fact that a plurality of views informs our public discourse regarding fundamental human questions. At times, these views flow from religious beliefs. At other times, they derive from philosophical or pragmatic judgments about the meaning and purpose of life.

This pluralism is the result of the free speech accorded by the Constitution to each citizen as well as the right both to freely exercise one's religion and to practice no religion. But this constitutionally protected pluralism has not been bought at the price of excluding religious or moral values from the public life of the nation. On the contrary, the goal of the American system has been to provide space for moral or religious substance in our society.

Indeed, in our pluralistic society we must decide how those who have such beliefs or ethical principles may appropriately participate in the development of public policy. In my view, positions that are informed by particular religious beliefs or philosophical assumptions need to be translated into commonly agreed upon language, arguments, and categories before they can become the moral or ethical foundations for key public policy choices.

Here's to the free exercise of religion by free men and women in a free society.

Pete, that was spoken like a true Ethics Officer. One reason that CoS members should definitely never read my book is that they might discover ideas not approved by RTC. I would not want CoS members to discover a

radically different spiritual perspective. Members of the Church of Scientology should never dare to read any book not written by L. Ron Hubbard. They should also never read the internet. That is the CoS party line, correct?

In my book, I show how Zen and other approaches can be used to liberate Consciousness from fixed identities. I know that CoS claims to be in the business of liberating people, but the Independents and Freezoners argue otherwise. Many CoS members seem to have hard, fixed identities. Where is their freedom?

\*\*\*\*\*

One of the things that has always interested me about Scientology is the cosmology L. Ron Hubbard created during his lifetime through his many books and lectures. Scientology contains a definite cosmology, the key sections of which are contained in its upper levels. The word, **cosmology** is defined as follows at Wikipedia:

**Cosmology (from Greek κοσμολογία - κόσμος, kosmos, "universe"; and -λογία, -logia, "study"), in strict usage, refers to the study of the Universe in its totality as it now is (or at least as it can be observed now), and by extension, humanity's place in it. Though the word cosmology is recent (first used in 1730 in Christian Wolff's Cosmologia Generalis), study of the universe has a long history involving science, philosophy, esotericism, and religion. (See Cosmogony for the study of origins of the Universe.)**

ref: <http://en.wikipedia.org/wiki/Cosmology>

What I have done in my new book is to create a new cosmology that results in an "open architecture" approach to Spirituality and Identity.

Hubbard created a "closed architecture" system in Scientology that is not open to anything that is not Scientology.

How can a person learn new ideas in a closed system?

What happens when Scientology ends as it does at New OT VIII?

Then what?

Well, reading all kinds of different books is one place to begin. Reading about different cultures and forms of spirituality has helped Independent Scientologists broaden their perspectives. The holy books of ancient cultures contain a wealth of surprising information about astronomy and the mythical depths of the human soul.

Nice picture, Swifty. Apparently, you ripped that one off from the offices of our builders, and it is copyrighted. You will be hearing from Ricky Toxin on that one. But since you posted it, the cat is out of the bag. That is the site of our new, ideal, super advanced org in LATAM. As you can see, it is centrally located and completely convenient to get to for just about everybody.

Of course, our first priority, after purchasing the site, will be to bulldoze all the ruins, and that may require some permits, but that is OK, that is why we have a legal staff. The special LATAM team is targeting the donation amounts even as I write this. We may need help from OSA to get the permits, but that is a story for another day to be told by the redges. It is, after all, the greatest good for the greatest number of dynamics.

Good luck with your book!

Don Carlo, my book is subtitled **The Queen of Heaven**. I think that is a definite hint that mine is probably a "Goddess" book. I did some of the research for the Goddess theme at the Masonic Library in San Francisco. I can assure you that the Queen of the Night is not ditched in Masonry.

BTW, this library is open to the public. People who live in the SF area and have an interest in esoteric works can drop by and check out its impressive collection of over 10,000 books:

Congratulations on your new book. I like ordering from Amazon. I did not see it available there. Does Lulu link to Amazon for print-on-demand?

It was great fun to read about your work at IOS. I see that IOS is planning to offer a little space tourism in 2012 for the low, low price of only \$800,000! And it all launches from an island in Tonga. How fun! I've always been fascinated by Tonga. It went from earning money by printing strange postage stamps to offshore banking and launching satellites. I'd love to visit there sometime.

It was also fun getting to know this side of you. It looks like you've explored many paths in your spiritual search: Scientology, EST, the Masons. It will be interesting to read your book to see how all this comes together in your thinking.

Curiosity, my book will migrate onto Amazon, Barnes & Noble, and other outlets in the next few weeks. As far as Interorbital Systems goes, anyone who is interested in a day trip out to Mojave Airport to see the factory please contact me. There are some details, etc. I was thinking of getting some LA area people for a day trip out there on a Saturday or Sunday. Many of the US private space ventures are located at Mojave Airport, including the famous Scaled Composites. Scaled is in a partnership with Virgin Galactic to build sub-orbital gliders. That would be a hoot to ride a rocket up to 100,000+ feet, feel some zero-g while looking at the curvature of the Earth, and then nose over and glide unpowered back to Mojave. If you look at Mojave Airport

from Google Satellite view, you can see the long runway there. You can also scroll over and see the nearby dry lake beds at Edwards AFB where the Shuttles sometimes lands.

Probity, thank you for purchasing my book. Your vote of confidence means a great deal as I know you are a person of very refined tastes, so much so that the White House calls you to ask for advice on wines, aperitifs, and **canapes** for State dinners.

\*\*\*\*\*

I have been working on this book for a long time. My friends know it as the "**Taking Forever Book**" and kindly indulged me for years in this grand obsession of mine to create a unique spiritual work. I have always tried to deliver quality work here OCMB and my book delivers my best as well. My book is full of surprises and none of them have to do with Scientology.

Writing at OCMB has been a tremendous experience, particularly because of the friends I have made. There are so many great people in the former CoS scene. This scene is more alive and vibrant than ever.

\*\*\*\*\*

I have always wanted to formalize the Spiritual Teaching that is in my book. Now that it is formalized, I will begin spiritual teaching and create a spiritual community of people who are attracted to the teaching. In shortand terms, I have fused my own unique teaching with elements of Zen and elements of Jungian archetypal psychology to create a fusion I call **DX Zen**. My teaching is a resolution of Self versus Non-Self, a central dilemma in spirituality and even neurobiological descriptions of what it is to be human.

This is another one of my images I created for this work. The book is very atmospheric, visual, and seductive:

CTTE, my book costs \$34.95. The full color PDF download is \$24.95. That is what it costs to find out what the Day Dream Pyramid is all about.

Your question brings up a need for me to answer some questions I have been asked. First, I asked Roan for permission before I announced my book here. After five years of doing free work at OCMB, I consider that I am in exchange on an announcement. My announcement is in no way an endorsement from OCMB, Andreas, or anyone who posts here. My announcement is simply a, "Look at what one of our members has written."

But more importantly, I wanted to announce my book on OCMB because this is where I have worked as a writer and critic. L. Ron Hubbard announced **Dianetics** in the pages of **Astounding Science Fiction** because he had written for the magazine. His readers would want to know what his new method was all about. In that vein, I wanted to announce my book on OCMB. My roots are here. I reasoned that some people who have read my work might want to know what kind of Spiritual book I would write and illustrate.

There are now many books coming out of this community of Scientology critics and former Scientologists. My book is part of that larger torrent. As such, I oppose Cultism and my book reflects it. My book is critical of Religion in many places and yet it affirms open and free Spirituality. I do not have a meter, a technique, or a bridge to sell. What I have is a unique perspective on the origin of the universe that results in a liberating view of human Consciousness.

\*\*\*\*\*

I have no plans to operate a Cult, nor could I ever be L. Ron Hubbard.

Having been J. Swift, having been a Scientology critic, I would be crucified if I ever displayed Hubbard or Miscavige-like tendencies.

I do want to start a spiritual fellowship because I like groups and doing spiritual work with like-minded people in a voluntary setting. In terms of legal structure, I would follow the precedent established by one of the finest

and most honest nonprofit religious groups in the US. That would be the [Billy Graham Evangelistic Association](#) (BGEA). Billy Graham has always inspired me because he was never in it for the money. Reverend Graham is the real thing. His lifetime shows that he walked his talk. While I do not agree with BGEA on many spiritual and social issues, I like the way in which it has always been financially transparent. BGEA provides financial data to groups such as Charity Navigator: <http://www.charitynavigator.org/index.c...orgid=3367>

Billy Graham's Board has always consisted of successful Christian businesspeople who know how to read a P&L and manage the Association in a way that they feel honors Jesus Christ. Of course, Franklin Graham can go off the deep end at times, but he is accountable to a real and actual Board of Directors. BGEA produces an annual report. Here is the 2006 report -- go to page 18 to see the Board members: <http://www.billygraham.org/assets/media...Report.pdf>

The long term religious groups that survive best in America have elected Boards, disclose financial data, and are accountable to their members. For example, The Church of Jesus Christ of Latter Day Saints has monthly statements for its members: <https://tech.lds.org/wiki/index.php/Chu...Statement>

Accountability and transparency are vital to any religious group.

Fair play J. Swift. I've no doubt your purposes are genuine (and hopefully you took my post somewhat tongue-in-cheek).

However, you must admit certain ironic first glance parallels between your work and that which you deconstruct routinely on this board, e.g.:

Scientology-- name invokes fusion between science and spirituality  
TechnoMysticism-- name invokes fusion between science and spirituality

Scientology-- solicits donations for the IAS  
TechnoMysticism-- has a page on Website promoting IOS

Scientology-- reactive bank which is mocked (dreamed) up  
TechnoMysticism-- day dream pyramid

Scientology-- lots of pretty graphics  
TechnoMysticism-- lots of pretty graphics I presume

Scientology-- infinity symbols, 8th dynamic, etc.  
TechnoMysticism-- discusses infinity on the first page

LRH-- writer who chilled with rocket engineer Jack Parsons  
J Swift-- writer who chills with rocket builders in the Mojave

LRH-- pure evil  
J Swift-- "I open Pandora's Box"

What the eyes see and the ears hear, the mind believes.

-Harry Houdini
